Chantal Couris
Manager, Indicator Research and Development
Canadian Institute for Health Information (CIHI)
Everyday in cardiac cath labs
Many Patients
Many comorbidities....
How can CIHI use this information?

CIHI links historically
across multiple data sources
to identify patient risk factors

Near, far,
wherever you are
Data linkage requires many standards
and privacy considerations

Once more CIHI opens the door
Providing comparable
Indicators to help improve health care in Canada
Thank you
